CONTENTS OF VOLUME 84

NUMBER 1, JUNE 15, 1986

IN MEMORIAM
JOHN R. MACDONALD AND GARY A. CLAWSON. Edward Aaron Smuckler 1

JOHN P. MATLOCK AND J. E. NIXON. Impaired Clearance, Elimination, and Metabolism of Plasma Cholesterol Esters Associated with Hypercholesteremia in Mice Fed Cyclopropenoid Fatty Acids 3

D. K. AGARWAL, S. EUSTIS, J. C. LAMB IV, C. W. JAMESON, AND W. M. KLUWE. Influence of Dietary Zinc on Di(2-ethylhexyl)phthalate-Induced Testicular Atrophy and Zinc Depletion in Adult Rats 12

RANDOLPH B. SLEET, JACQUELINE A. JOHN-GREENE, AND FRANK WELSCH. Localization of Radioactivity from 2-Methoxy[1,2-^{14}C]ethanol in Maternal and Conceptus Compartments of CD-1 Mice 25

L. M. SAYRE, C. M. SHEARSON, T. WONGMONGKOLRIT, R. MEDORI, AND P. GAMBETTI. Structural Basis of γ-Diketone Neurotoxicity: Non-neurotoxicity of 3,3-Dimethyl-2,5-hexanedione, a γ-Diketone Incapable of Pyrrole Formation 36

CARL L. POTTER, ROBERT W. MOORE, STANLEY L. INHORN, THAD C. HAGEN, AND RICHARD E. PETERSON. Thyroid Status and Thermogenesis in Rats Treated with 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin 45

JAMES L. CHARLES, DAVID JACOBSON-KRAM, LYMAN W. CONDIE, JR., JOSEPH F. BORZELLECA, AND RICHARD A. CARCHMAN. The Kinetics of *in Vivo* Sister Chromatid Exchange Induction in Mouse Bone Marrow Cells by Ethylnitrosourea and Methylnitrosourea 56

LLOYD A. DETHLOFF, LINDA B. GILMORE, BETH C. GLADEN, GERWYN GEORGE, RAJENDRA S. CHHABRA, AND GARY E. R. HOOK. Effects of Silica on the Composition of the Pulmonary Extracellular Lining 66

JOANNE M. FRASER, JAY B. SILKWORTH, AND LAURENCE S. KAMINSKY. Mechanism of Toxicity of 2,2,2-Trifluoroethanol in Rats 84

SHAYNE C. GAD, BRENDAN J. DUNN, DONALD W. DOBBS, CHRISTOPHER REILLY, AND ROBERT D. WALSH. Development and Validation of an Alternative Dermal Sensitization Test: The Mouse Ear Swelling Test (MEST) 93

JAMES C. LAMB IV, MARTHA W. HARRIS, JAMES D. MCKINNEY, AND LINDA S. BIRNBAUM. Effects of Thyroid Hormones on the Induction of Cleft Palate by 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin (TCDD) in C57BL/6N Mice 115

HARUKO KOIZUMI, MITSUTOSHI WATANABE, HIROAKI NUMATA, TADASHI SAKAI, AND HIROSHI MORISHITA. Species Differences in Vacuolation of the Choroid Plexus Induced by the Piperidine-Ring Drug Disobutamide in the Rat, Dog, and Monkey 125

R. H. MCKEE, J. P. HINZ, AND K. A. TRAUL. Evaluation of the Teratogenic Potential and Reproductive Toxicity of Coal-Derived Naphtha 149

LOIS D. LEHMAN AND CURTIS D. KLAASSEN. Dosage-Dependent Disposition of Cadmium Administered Orally to Rats 159

MANFRED GAREIS, AYMAN HASHEM, JOHANN BAUER, AND BRIGITTE GEDEK. Identification of Glucuronide Metabolites of T-2 Toxin and Diacetoxyscirpenol in the Bile of Isolated Perfused Rat Liver 168

VILAS SHIRHATTI, MARIAM GEORGE, RICHARD CHENERY, AND GOPAL KRISHNA. Structural Requirements for Inducing Cardiotoxicity by Anthracycline Antibiotics: Studies with Neonatal Rat Cardiac Myocytes in Culture 173

SHORT COMMUNICATION

M. I. FONSECA, J. S. AGUILAR, C. LÓPEZ, J. C. GARCÍA FERNÁNDEZ, AND E. DE ROBERTIS. Regional Effect of Organochlorine Insecticides on Cholinergic Muscarinic Receptors of Rat Brain . . . 192

Footnotes should be identified in the text by superscript Arabic numerals and cited consecutively throughout the paper. All footnotes should be listed in order typed double-spaced on a separate sheet. Proprietary names of substances and names and addresses of suppliers should be identified in footnotes. If the paper has been presented orally in whole or in part, the date, and occasion should be included in a footnote.

Tables must be typed double-spaced on a separate sheet with the title typed directly above the table. Do not use abbreviations in the title. The title and footnotes must contain all the information necessary to understand and interpret the table without reference to the text. Tables must be numbered consecutively with Arabic numerals. Footnotes to tables should be identified by superscript lowercase letters ^{a,b} etc., and placed at the bottom of the page containing the table. Letters should be assigned to table footnotes alphabetically in order of appearance as the table is read *horizontally*, not vertically.

Figures should be numbered consecutively with Arabic numerals. All legends are to be typed consecutively on a separate sheet. All figures should be planned to fit the proportions of the printed page (5.5 × 8 in.; column width, 2.5 in.); wherever possible, figures will be reduced to single-column width. Lettering on the original figure should be large enough to be legible after reduction of the figure to single-column width (approximately 50 to 60%). *Differences in type size within a single figure should be no more than approximately 15%*. Standard mechanical lettering sets should be used. Characters should be approximately 3/16-in. high (Leroy lettering size 140). *In addition, symbols used to identify points within a graph should be large enough that they will be easily distinguishable after reduction.* Graphs should be plotted with black India ink on white paper no larger than 8.5 × 11 in. Grid lines that are to show must be inked in black.

All copies of halftone photographs and electron micrographs *must* be glossy prints or originals; photocopies of halftones do not show sufficient detail to be used for the review process. Photographs must be kept to a minimum. Photographs should be glossy prints (5 × 7 or 8 × 10 in.). Overlays indicating the parts of the electron micrographs that are to be emphasized must be used. Electron micrographs should be submitted not larger than 6.5 × 4.5 in. Magnifications should be indicated in the figure legends. Illustrations in color can be accepted only if the authors defray the cost.

Identify all figures on the back, in *pencil,* with authors' names and figure number, and indicate the TOP.

Index terms suitable for use in the subject index must be submitted on a separate sheet. The list should include chemical name, generic name, common name, and may include proprietary name of each important substance used in the experiments. It should also include biological activity of each substance investigated. Terms should elucidate important relationships.

Nomenclature. For styling of isotope, enzyme, and biochemical nomenclature, consult the Information for Authors of the *Archives of Biochemistry and Biophysics.*

Abbreviations. Units will be in general accordance with the International System (SI) as adopted by the 11th General Conference on Weights and Measures. Periods are not used after abbreviations (note exceptions, e.g. in. for inches).

Common abbreviations to be used in this journal are:

m	meter	ppm	parts per million
cm	centimeter	cpm	counts per minute
mm	millimeter	dpm	disintegrations per minute
μm	micrometer	sc	subcutaneous
nm	nanometer	ic	intracutaneous
kg	kilogram	im	intramuscular
g	gram	ip	intraperitoneal
mg	milligram	iv	intravenous
μg	microgram	po	oral
ng	nanogram	LD50	median lethal dose
ml	milliliter	LC50	medial lethal concentration
μl	microliter	Hz	hertz
mol	mole	°C	centigrade
M	molar	sec	seconds
mM	millimolar	min	minutes
μM	micromolar	hr	hours
N	normal	SD	standard deviation
Ci	Curie	SE	standard error
$\bar{x}$	mean	TLV	threshold limit value

Reprints. A reprint order form will accompany the proofs. Fifty reprints of each article (without covers) are supplied free of charge.

Communications. Toxicology and Applied Pharmacology will accept a limited number of brief reports of work that has progressed to the stage at which it is considered that the science of Toxicology would be advanced if the results were made available as soon as possible. These reports will be designated "Communications." Authors should submit short papers for this category of publication only when they believe that the rapid communication of the results is of the utmost importance to other investigators. The manuscript must be submitted in duplicate and conform strictly to the form and style of the journal. The length must be such that it will require no more than two pages in the present format of the journal.

Letters to the Editor. Letters to the Editor will be accepted for publication subject to Editorial Board approval, provided that the content deals with papers published in *Toxicology and Applied Pharmacology* and that the comments are of scientific value. Letters should be received within two months of mailing of the journal and should be no longer than 250 words. Introduction of new data will not be permitted. Each letter will be submitted to the author of the original paper in order that any reply may be published simultaneously with the letter.

Announcements: Toxicology and Applied Pharmacology will accept for publication announcements of interest to toxicologists such as notices of society meetings, symposia, or other matters.
